

MA in STEM Education at Sheffield Hallam University

- Deepen your knowledge of current STEM education issues.
- Explore STEM education programmes, climate education debates, and leadership theories.
- Consider issues of social justice and inclusion in STEM education.
- Develop your own research project.

The part-time MA STEM Education provides the skills and knowledge to debate contemporary issues in STEM education and critically appraise research evidence and policy.

Running over two years, the topics include STEM education programme design, climate education and sustainability, social justice in STEM education and leading innovation. The course will help you to develop the abilities and confidence needed to identify an issue in your educational context and undertake your own research project.
